

# RETHINKING SCHIZOPHRENIA

## European Brain Council (EBC) Project Rethinking Schizophrenia Care Pathway

The [second phase of the Rethinking Schizophrenia project](#), co-created by the European Brain Council (EBC) and the European Psychiatric Association (EPA), aims to describe the care pathway of people from the first episode of psychosis and schizophrenia to long-term care throughout the mental health system in different European countries with a focus on youth and young adults. We invite all healthcare providers (psychiatrists, psychologists, nurses, social workers, general practitioners, etc.), particularly from the selected countries (Belgium, Denmark, France, Germany, Hungary, Italy, Poland, Spain and UK), to share their insights on this topic.

It takes approximately 10 minutes to fill in the form.

The responses are anonymous and should primarily reflect the situation in your country, your personal experience and opinion.

**Runtime of survey:** 13th May – 30th June 2024

Thank you!
